AIRLESS FOAM WAND

Item #:

- X400-113

SPECIFICATIONS

Our Foam Up Series creates foam without the need for compressed air!

Use downstream from your Dosatron. The chemical solution flows through the airless foam wand which draws in atmospheric air to create, and project, wet clinging foam, increasing chemical contact time and effectiveness.

Perfect for both large and small applications.

FEATURES

Polypropylene
Equipped with 1/2" stainless steel ball valve
Pump fed (downstream from a chemical injector)
Use between 35-125 psi

Description	Item #
6.3 GPM @ 40 psi. 20 ft throw at 60 psi. Ideal for super quick coverage of very large areas or surfaces.	X400-113
