CHEMSTICK

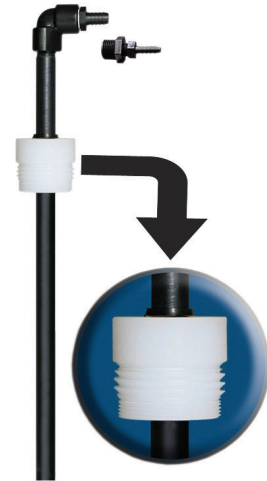

SPECIFICATIONS

The ChemStick was designed to be used with either a barrel or tote, and easily connects to existing pick-up tubes.

Tote Plate Covers and Bung Adapters stop debris and contaminants from entering the tote / barrel.

FEATURES

Chemical and acid resistant polypropylene construction with viton seals
Adjustable stopper for setting depth
Rigid pipe to overcome common problems with flexible tubing
Vented
Check valve helps to prevent back flow into the container
Maintains suction tube at the bottom of the container
