SOLUTIONS

NEW

ULTRASONIC MICRO-DOSER CABINET

Protection from
Accidental Exposure
to Potentially
Hazardous Chemicals

- Easy to install,
just connect it to the
water source.
- Available in 3/4" for
Hydroponic Applications
and 1 1/2" for
Standard Horticulture.

Ultrasonic Micro-Doser System, Perfect for Soil pH Management!

The **NEW Ultrasonic Micro-Doser System** is designed to proportionately add highly concentrated chemicals into water.

The Low Flow Cut Off prevents the accidental dosing of concentrates, while the enclosed secure system protects workers from accidental exposure to hazardous chemicals.

Features

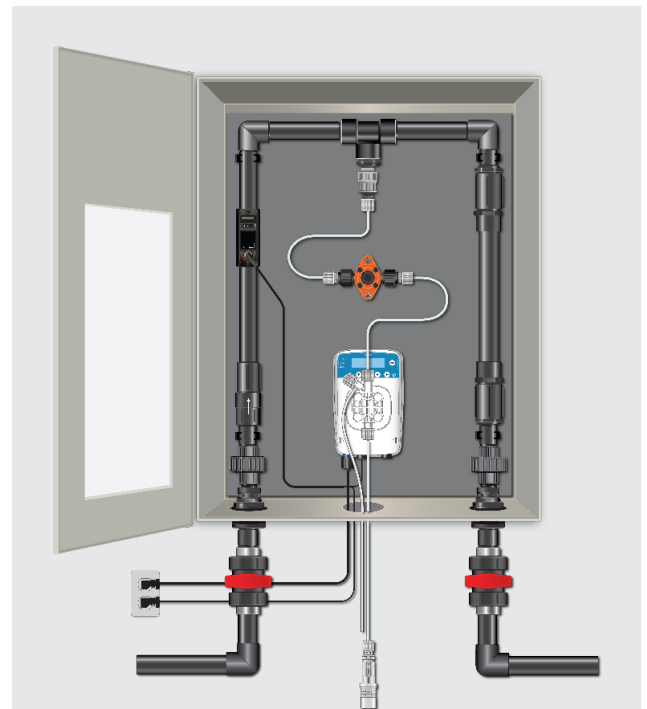

24" x 30" secure cabinet
High performance dosing pump
Standard PVDF wetted parts
Standard Teflon® diaphragm
User determined Low Flow Cut Off
Ultrasonic flow meter with digital flow display
Back pressure relief valve / anti-siphon valve
Static mixer
Chemical resistant plastic parts
Water resistant

3/4" System perfect for:

- pH Adjustment for Optimal Growing Conditions
- Nursery Mist / Fog
- Low Flow Drip Applications
- pH Control for Cuttings

1 1/2" System perfect for:

- Large Flow Applications
- Central Systems
- Whole Greenhouse
